

SPECTRAL ANNOUNCES STATUS OF SECOND INTERIM ANALYSIS

TORONTO, Canada – January 28, 2014 – Spectral Diagnostics Inc. (TSX:SDI) (OTCQX:DIAGF) (“Spectral” or the “Company”), a Phase III company developing the first theranostic treatment for patients with severe sepsis and septic shock, today announced that the Data Safety Monitoring Board (DSMB) has evaluated the safety, efficacy and futility of its EUPHRATES trial based on actual data for 184 randomized patients followed for 28 days.

The DSMB has recommended that the trial continue, but has asked that further analysis be performed before recalculation of the trial’s sample size is finalized.

“The Company will await the specifics of the DSMB report, expected soon, before determining next steps in its clinical and commercial pathway,” said Dr. Paul Walker, President and CEO of Spectral Diagnostics.

About Spectral Diagnostics

Spectral is a Phase III company seeking U.S. FDA approval for its lead theranostic product for the treatment of severe sepsis and septic shock. Toraymyxin is a therapeutic hemoperfusion device that removes endotoxin, which can cause sepsis, from the bloodstream. Directed by the Company's Endotoxin Activity Assay (EAA™), the only FDA-cleared diagnostic for the risk of developing sepsis. Spectral's EUPHRATES trial is the world's first theranostic trial in the area of sepsis.

Toraymyxin has been approved for therapeutic use in Japan and Europe, and has been used safely and effectively on more than 100,000 patients to date. In March 2009, Spectral obtained the exclusive development and commercial rights in the U.S. for Toraymyxin, and in November 2010, signed an exclusive distribution agreement for this product in Canada.

More than one million patients in the United States are diagnosed with sepsis each year. Approximately one third of these patients progress to severe sepsis and septic shock, representing a significant unmet medical need and a potential market size in excess of \$2 billion.

Spectral is listed on the Toronto Stock Exchange under the symbol SDI, and on the OTCQX under the symbol DIAGF. For more information please visit www.spectraldx.com

Forward-looking statement

Information in this news release that is not current or historical factual information may constitute forward-looking information within the meaning of securities laws. Implicit in this information, particularly in respect of the future outlook of Spectral and anticipated events or results, are assumptions based on beliefs of Spectral's senior management as well as information currently available to it. While these assumptions were considered reasonable by Spectral at the time of preparation, they may prove to be incorrect. Readers are cautioned that actual results are subject to a number of risks and uncertainties, including the availability of funds and resources to pursue R&D projects, the successful and timely completion of

clinical studies, the ability of Spectral to take advantage of business opportunities in the biomedical industry, the granting of necessary approvals by regulatory authorities, the ability to manufacture products and supply the market, as well as general economic, market and business conditions, and could differ materially from what is currently expected.
