## 6. Risk management

### *i. Financial risk management*

In the normal course of business, the Company is exposed to a number of financial risks that can affect its operating performance. These risks are: credit risk, liquidity risk and market risk. The Company's overall risk management program and prudent business practices seek to minimize any potential adverse effects on the Company's financial performance.

The Company achieves this by maintaining sufficient cash and cash equivalents and managing working capital. These commitments are based on enrolment of up to 605 patients at up to 60 clinical sites in the U.S. and Canada and are dependent on the rate of patient enrolment and the duration of the trial. The Company is only committed to the costs to the extent that patients are enrolled in the trial.
